

Designing Dynamic Learning Environments for Trans-Competence Acquisition

iCamp

Fridolin Wild

Vienna University of Economics
and Business Administration

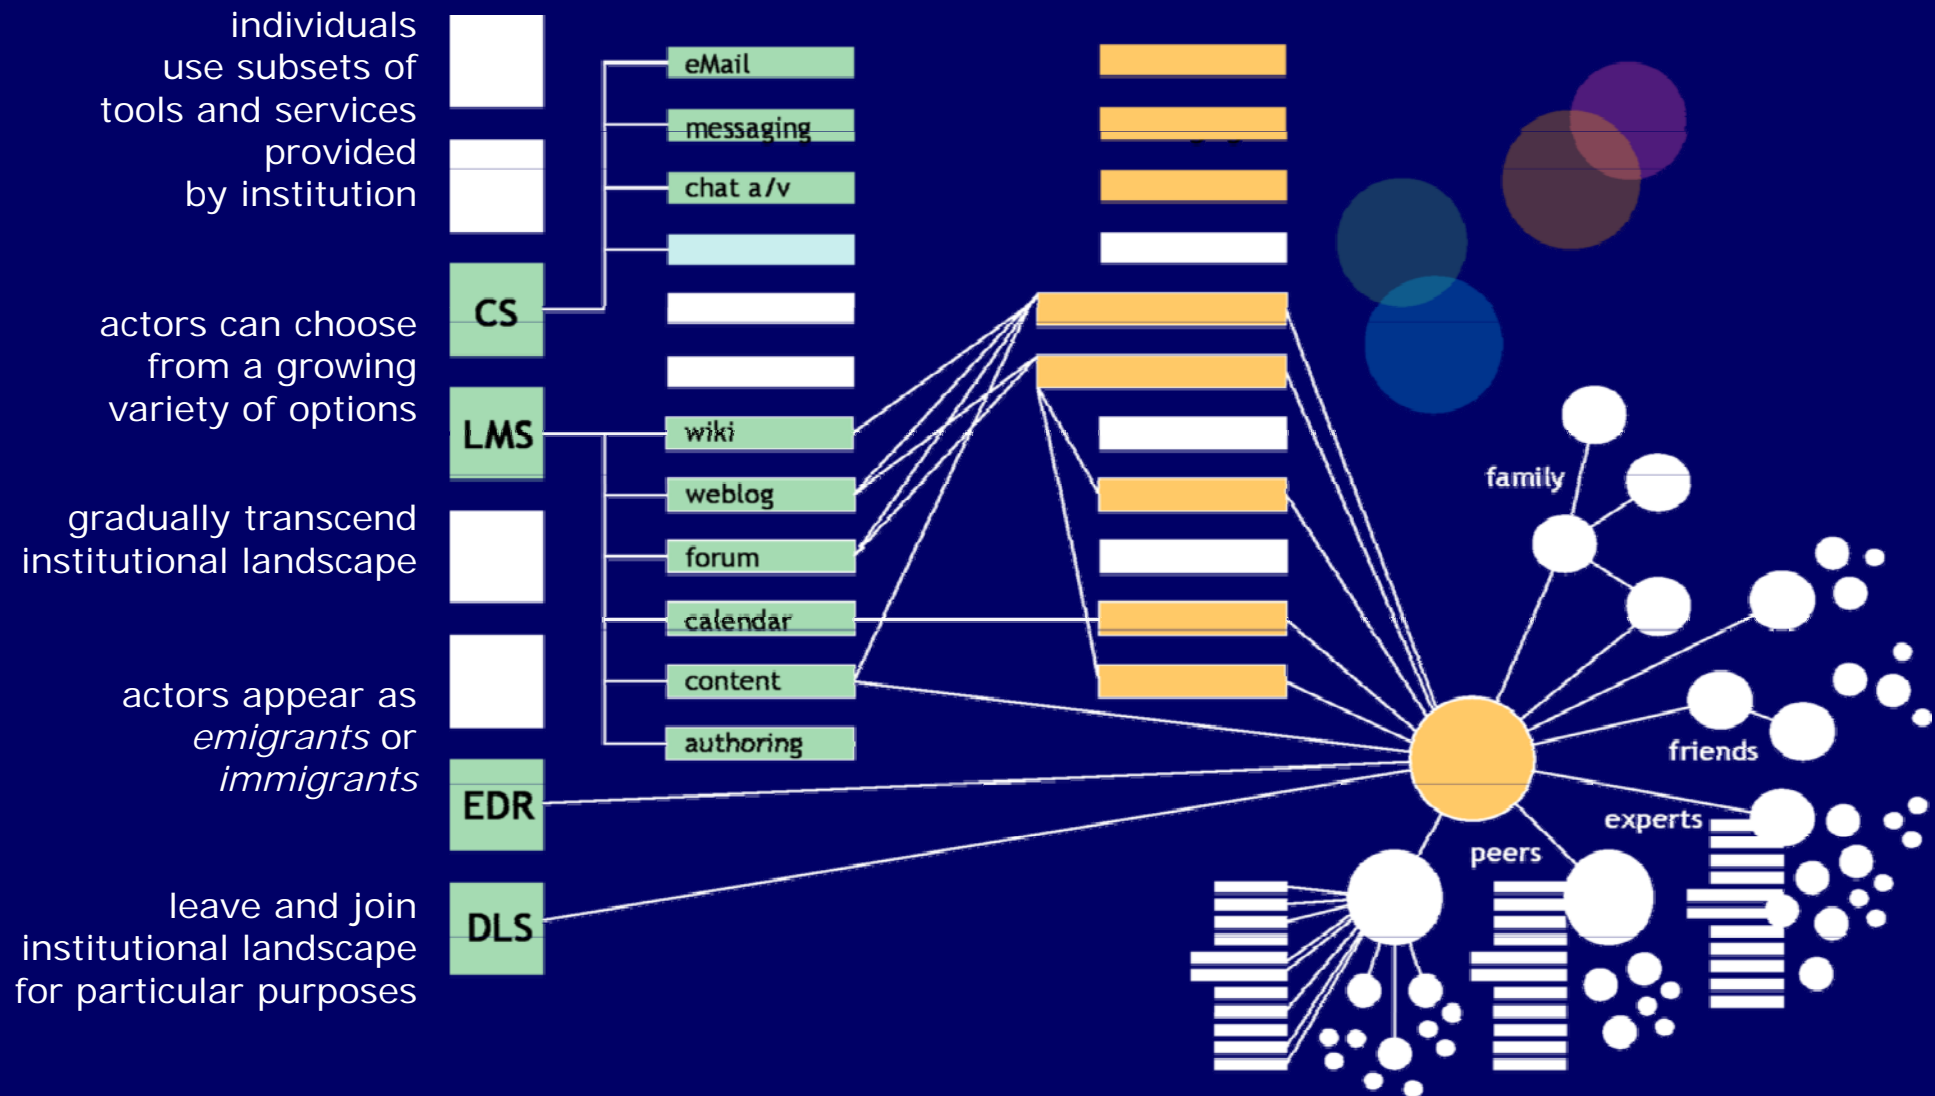

Agenda

- The iCamp Project
 - Aims & Context
 - Augmented Landscapes
 - Competence Acquisition
- Learning Activities (AT)
- Web-Application Mash-Ups
- Mash-Up PLE (MUPPLE)
- Designing Activity-Driven MUPPLEs
- Sharing Experiences through Patterns
- Statement: Learning in The New Web

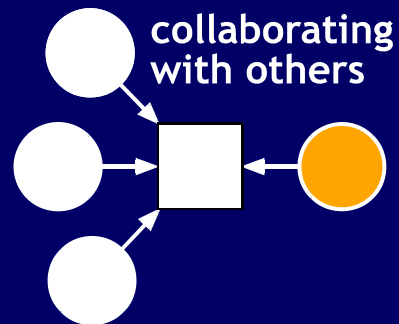

The iCamp Project

Augmented Landscapes

Competence Acquisition

self-directing &
self-organising

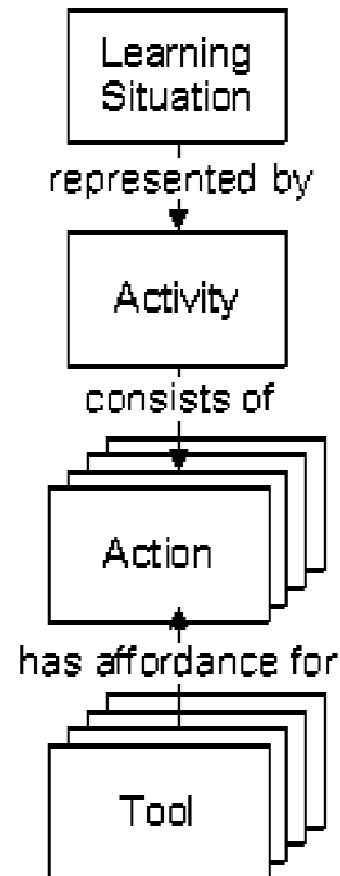

**Social- & Self-Competences (Hyperc.), not
Professional Competence!**

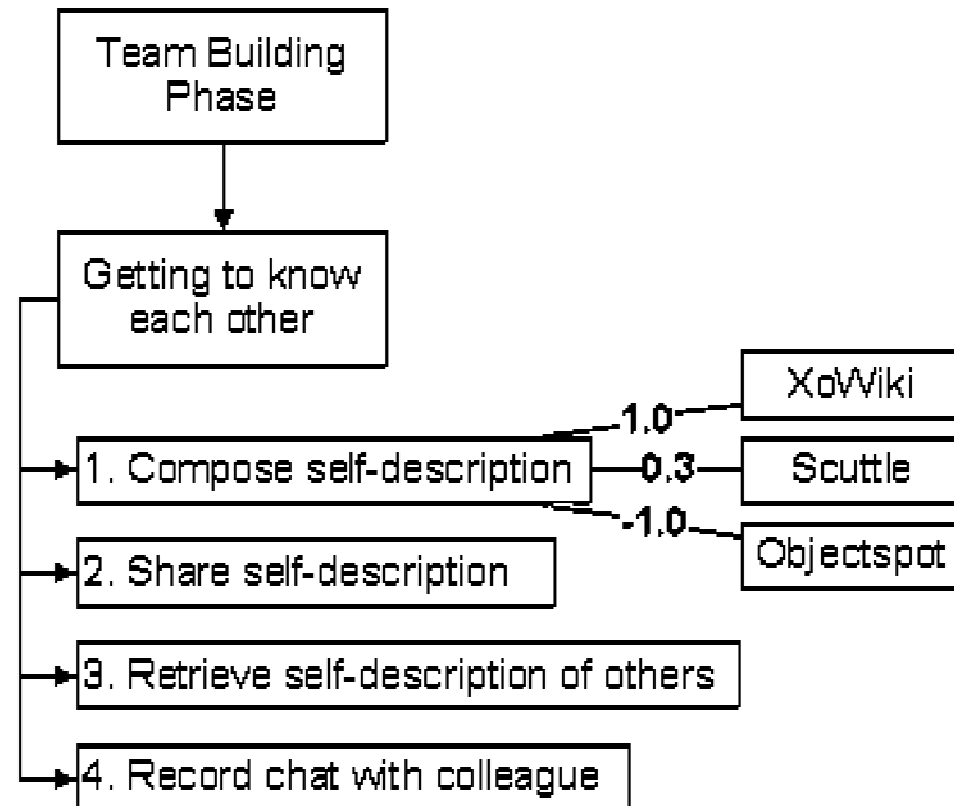

Competence is constructed from
certain **learning activities**

Learning Activities

Learning Context

Example

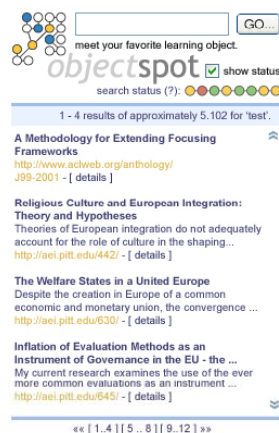

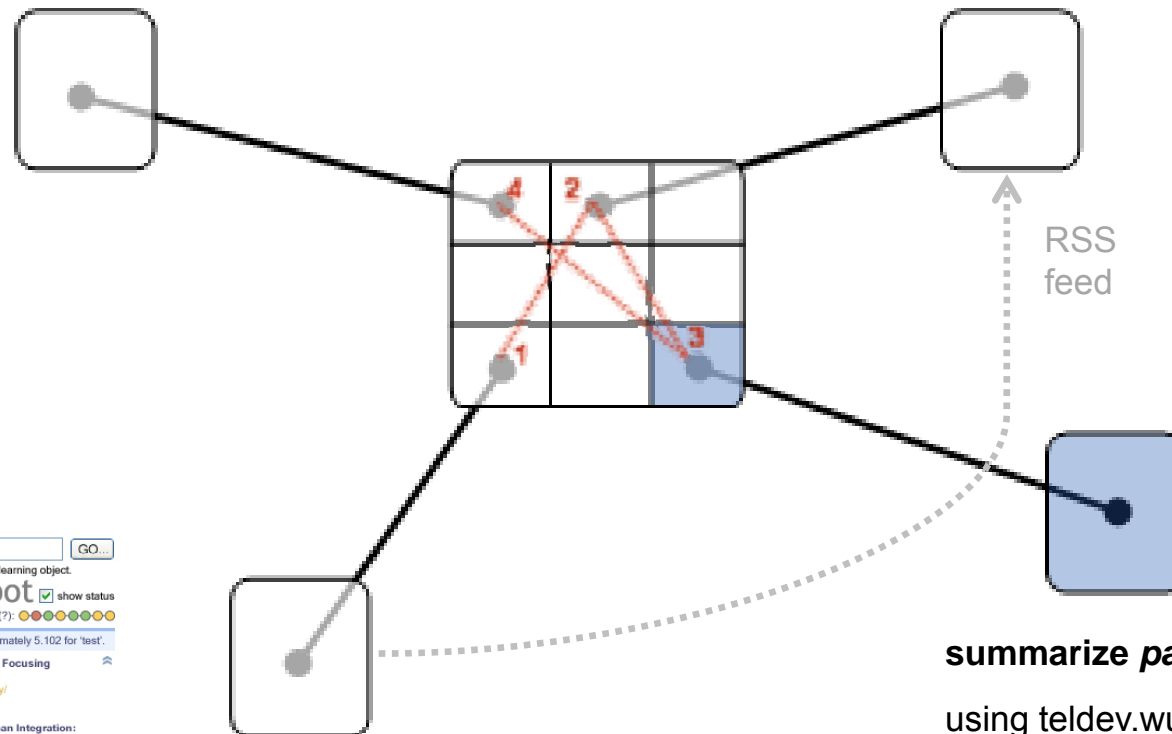

Web-Application Mash-Up

{ do s.th. } { for an output }

{ using http://... }

summarize *papers*

using teldev.wu-wien.ac.at/xowiki

MUPPLE: a Mash-Up PLE

- Set of Web-Based Tools for learning, client-sided aggregation
(= ‘web-application mashup’)
- Recommend **tools for specific activities**
 - through design templates
 - through data mining
- **Scrutable**: give learner full control over learning process
- **Track learner interaction & usage** of tools and refine recommendations

“Mupples were small furry creatures that were imprisoned at the Umboo Lightstation when Mungo Baobab, C-3PO and R2-D2 rescued them. Some considered Mupples a delicacy.”

-- <http://starwars.wikia.com/wiki/Mupple>

Mash-UP
Personal
Learning
Environments

Learner Interaction Scripting Language (LISL)

```
// definitions
define [an] activity "getting to know each other"
define [...] action "publish"
define tool "xowiki" [with] url http://xowiki.icamp.eu
define tool "wordpress" url http://wordpress.icamp.eu
define tool "videowiki" url http://distance.ktu.lt/videowiki
define action "broadcast"
define action "introduce"

// actions
publish "self-description" [using tool "xowiki"]
broadcast "meeting" using tool "wordpress"
Introduce "yourself" using tool "videowiki"
```

MUPPLE
loves LISL !

Activity Getting to Know Each Other

activity space

- phase 1
 - getting to know each other
 - collaborative writing (3)
 - personal learning contract (5)

Sharing Activity Patterns

- Patterns (Alexander, 1979) consist of:
 - Context
 - Problem
 - Solution
 - Collections of Aligned Patterns:
Pattern Language
 - e.g. for ,office buildings‘
 - e.g. for ,private homes‘
- **Allow for Experience Sharing & Learning from Best-Practice**

Learning in the New Web

- ‘individual’ not ‘institutional’
- ‘collaborative team’ not ‘isolated single’
- ‘multi-tool’ not ‘content-based’
- ‘learning to learn’ not ‘knowledge transmission’
- ‘activity sequences’ not ‘self-paced models’

= ‘TEL 2.0’ not ‘TEL 1.0’
